

Project 2 Proposals

Choosing a Platform

I really couldn't decide on one medium/platform to work on but I thought a lot about the 'visualization' of the web and how I could disturb the web.

Snapchat: Extension

Uses facial recognition to put snapchat filters on the web.

Snapchat: Political AR

+

=

?

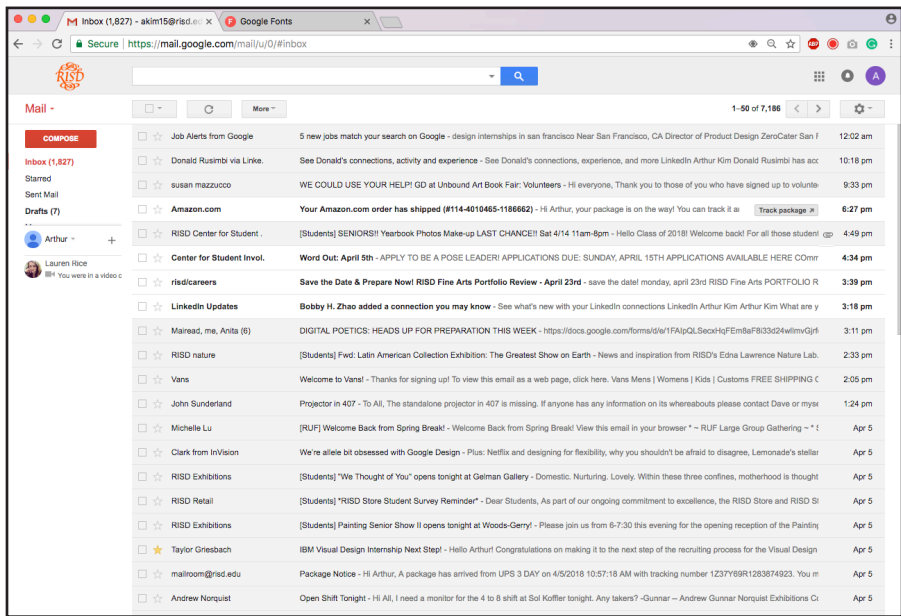

Using snapchat's new AR api features to create my own collection of AR filters.

Instagram: Webcam Reel

Every hour or so, using this extension would take a photo using your webcam and upload it on to your instagram.

Visualizing the Web

Press the extension and create a web data visualization of the web-site's structure.
